KEMET®**

General Assembly Instructions

The following are basic instructions for any of the Quick Start Inserts:

- All panels are labeled with an Alphabet letter (A, B, C, etc.). First sort all panels into piles by their letters before you begin to assemble.
- Layout the parts in the diagrams provided, to ensure you have all the parts
- Glue only the edges that come into contact with the wood (remove excess immediately)
- Allow 24 hours to dry before using

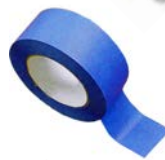

Tips & Tricks

- Some of the parts might need to be slightly sanded on the edges for a perfect fit.
- Sometimes tapping the pieces with a small amount of force (with a mallet) helps create a tighter fit.
- Taping the outside corners of the boxes helps it hold in place while the glue is drying.
- If you break a part, don't hesitate calling we always carry spares – you just need to cover shipping. (most spares can be send in an envelope, if so we don't charge for shipping)

Assembly Supplies

Beacon 527 or wood-glue
(we recommend supper-glue)

Painters blue tape
(painter's tape helps protect the finish)

Rubber mallet
(or something to tap the pieces together)

Cotton swap/ Q-tip
(or something to wipe the excess glue)

Sheet D2:

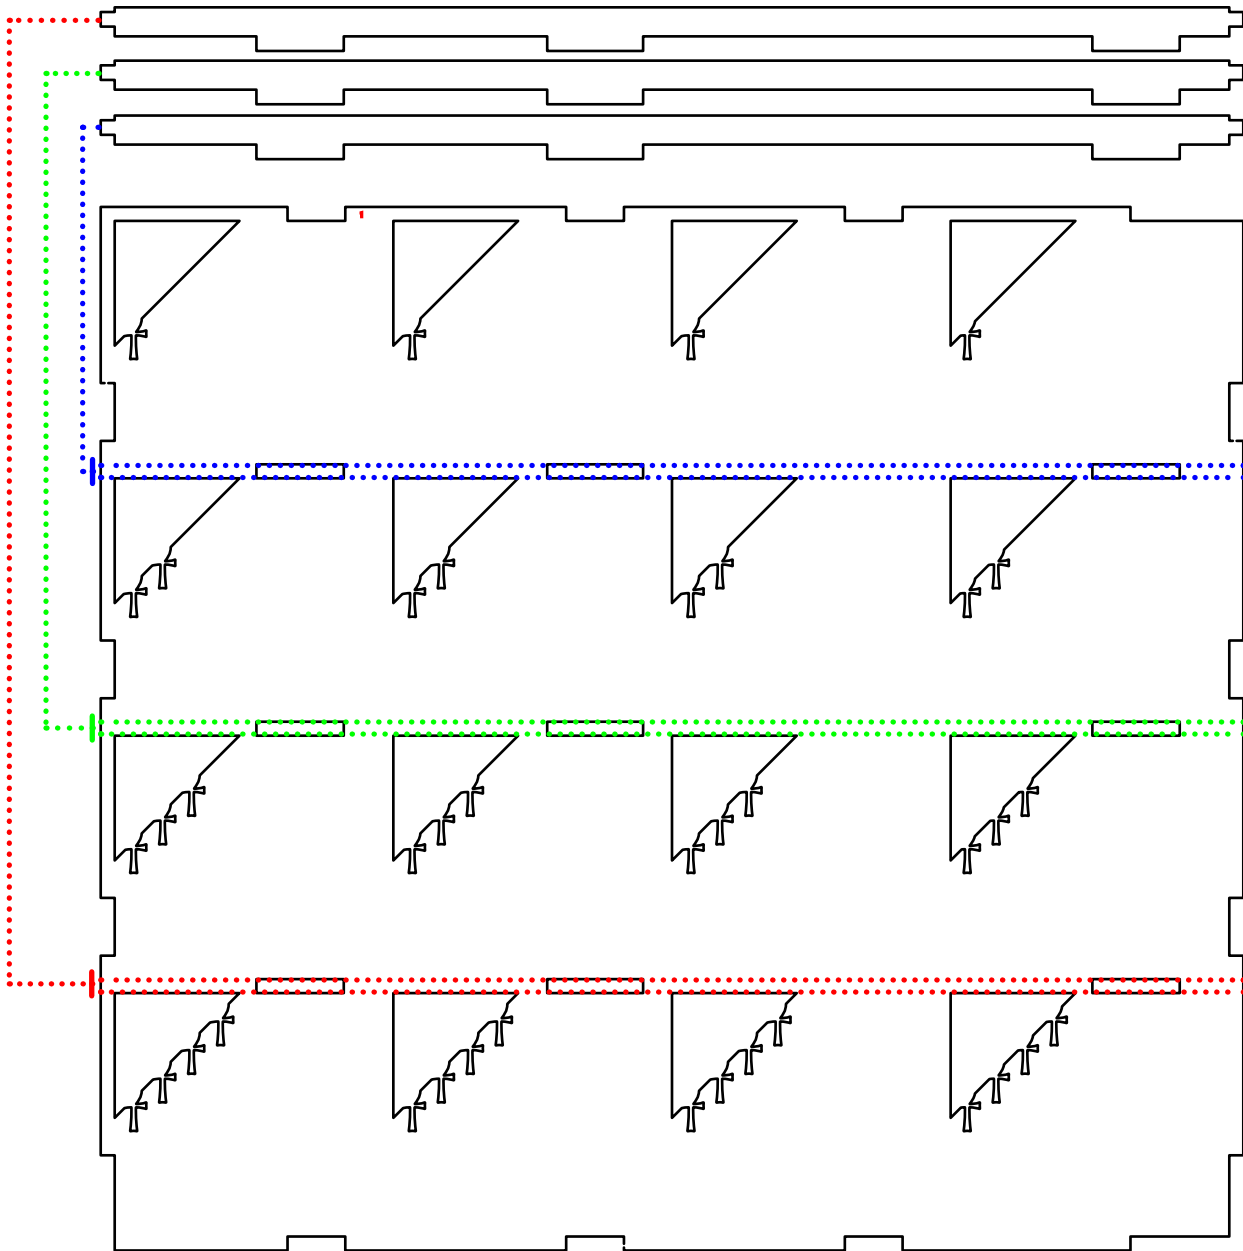

&

Step 1:

1. Glue and Assemble the 3 dividing tabs on all 4 trays (A, B, C, & D)

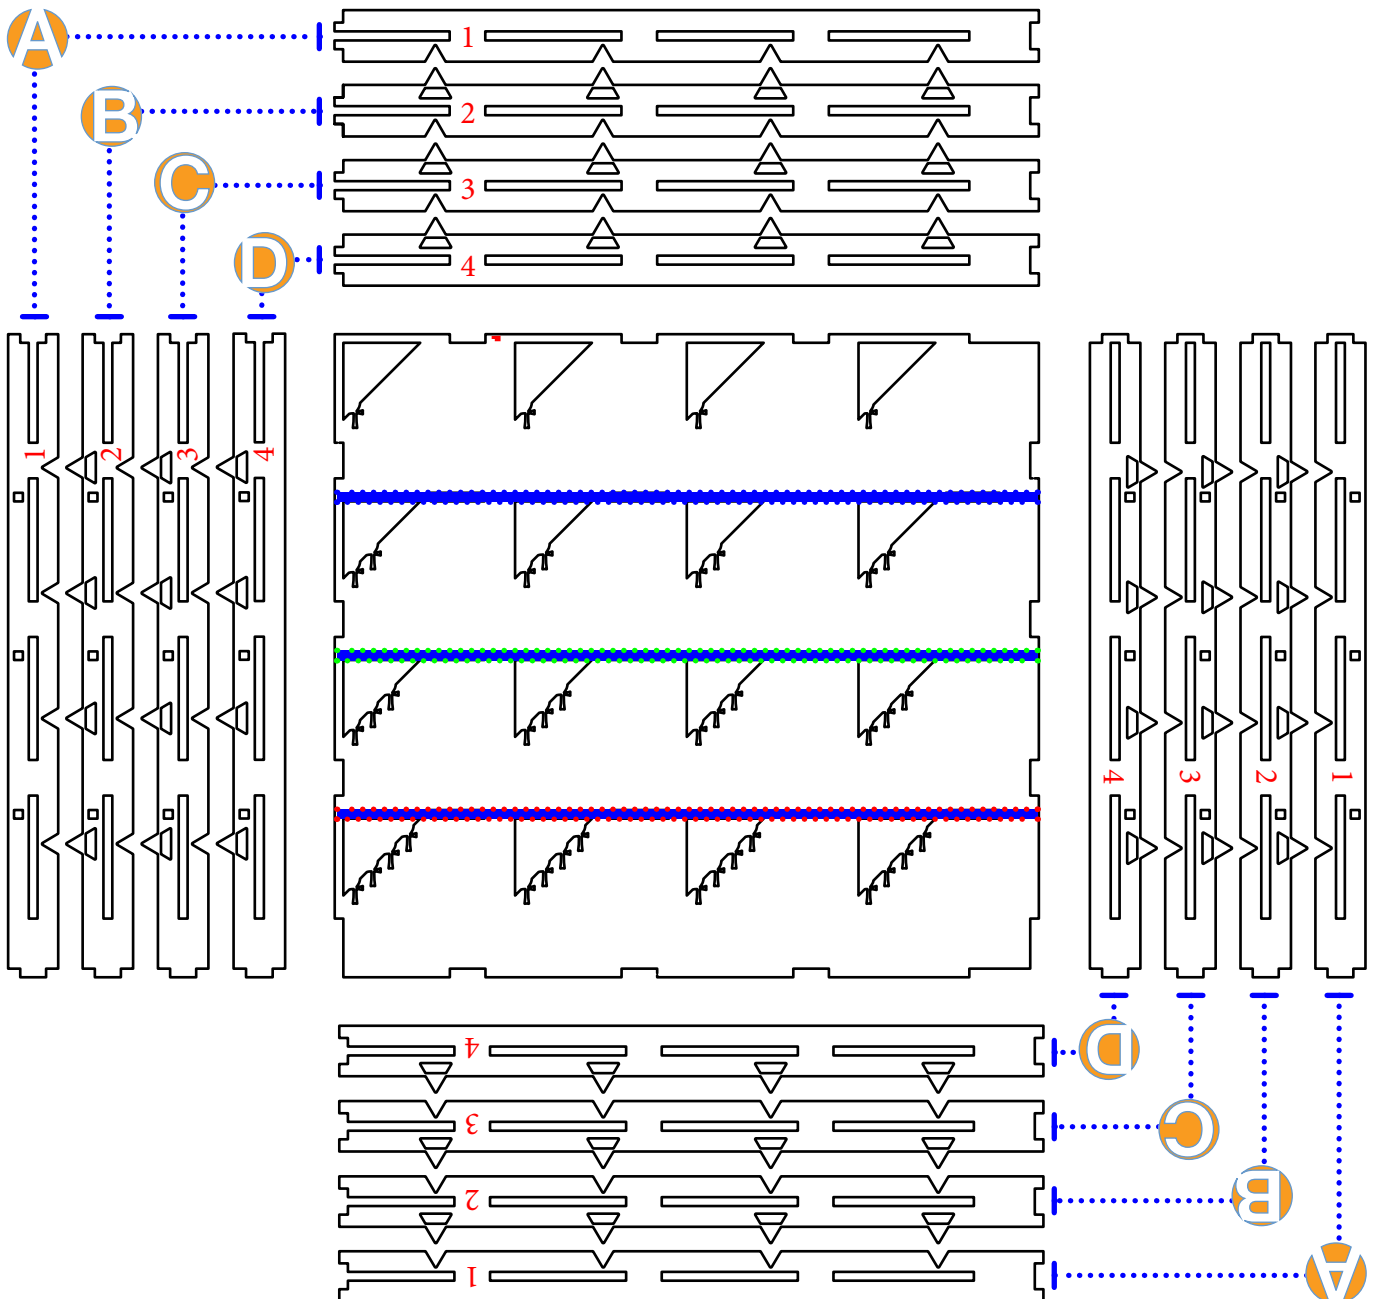

&

Step 2:

1. Layout all pieces like below

*Note: ~90% of edge pieces are unique

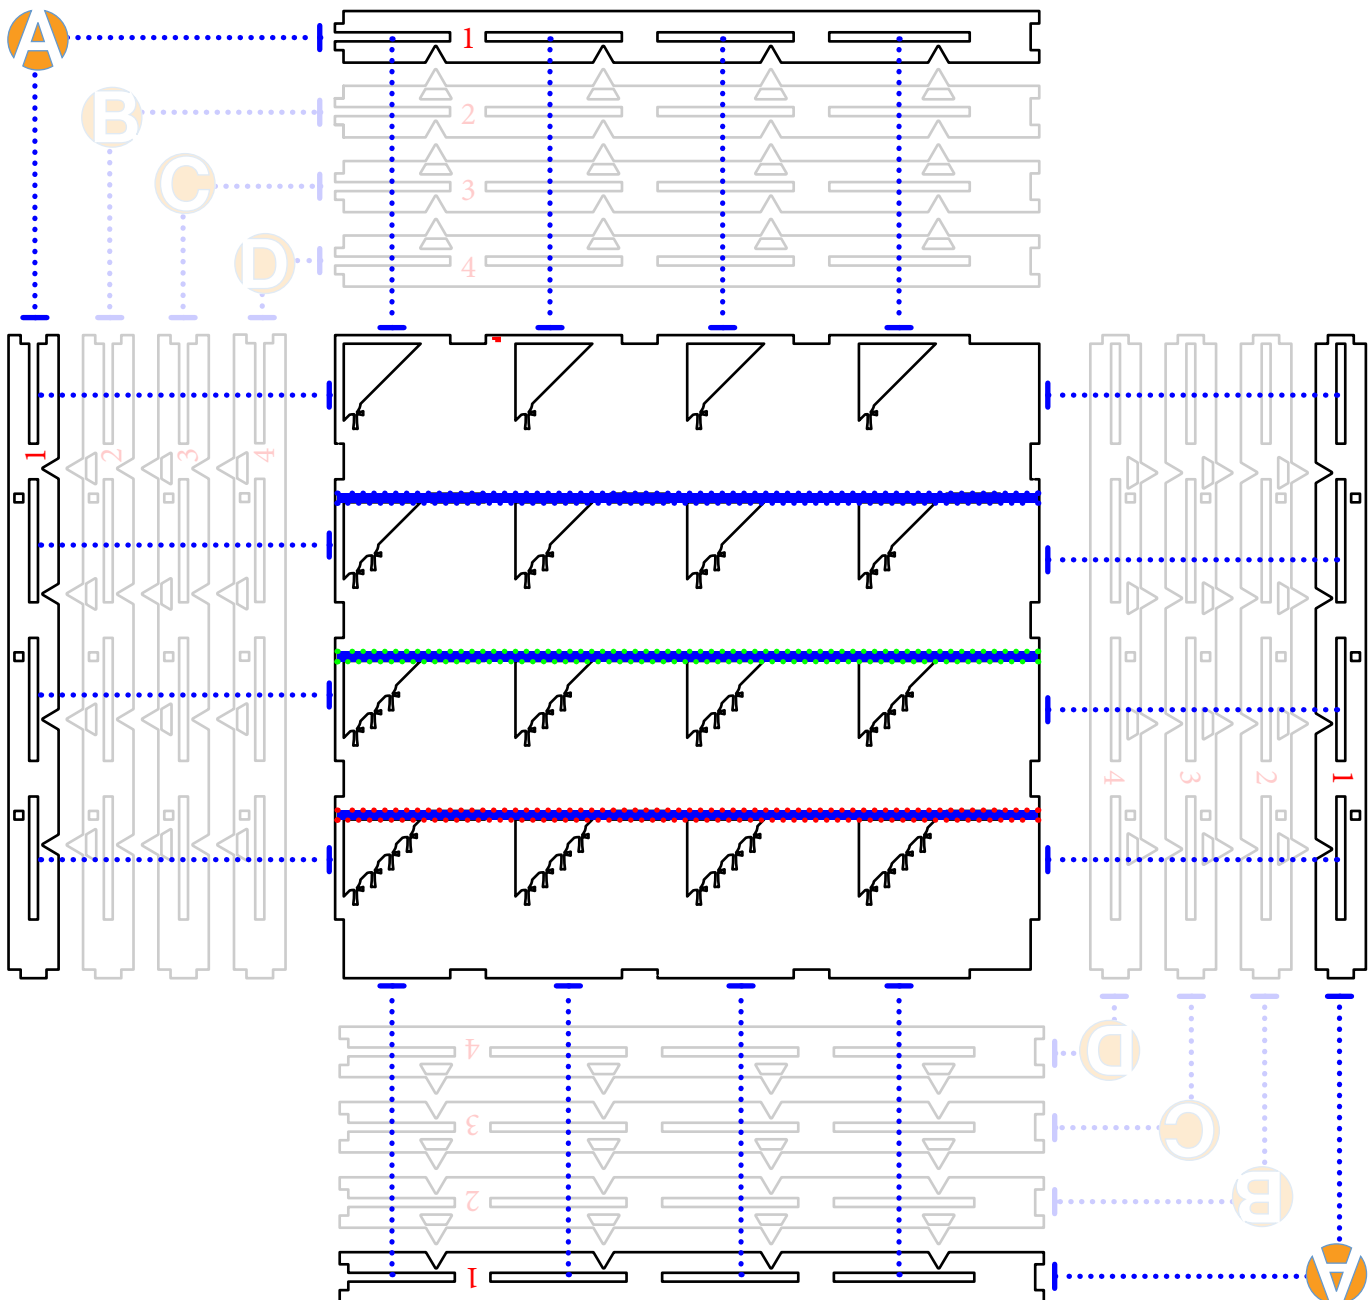

&

Step 3:

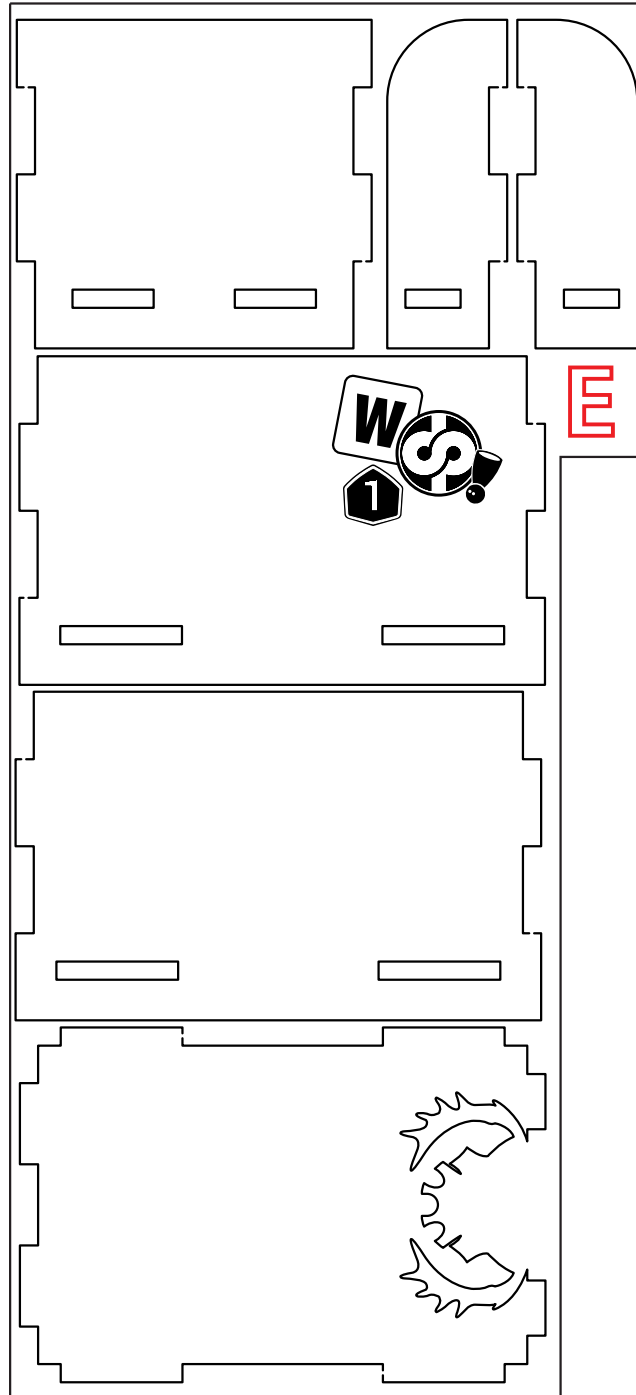

1. Being careful to keep each piece's orientation , Glue and Attach all **A** pieces to their center plate (Labeled with a #1)
2. Once you have Assembled and Tapped the corners on Tray A, set it upside down (smooth side down)
3. Repeat Step 3:1 for sections B, C & D pieces
4. Upon completion of Section B flit is upside down on Section A and tape together to glue. Repeat the same process for Sections C & D

**Note: Make sure you are careful to keep #1's flat side up, and the pyramid points up for #'s 2-4*
